Dear Dr. Mohammad Salehudin,

We have completed the preliminary review for your manuscript entitled "The Users' Experiences in Processing Visual Media for Creative and Online Learning Using Instagram" (Manuscript ID#2103081206). It is suitable for our journal's scope. We will send your paper to the referees to evaluate.

However, our initial analysis of your paper through iThenticate.com has showed 14% plagiarism. So the editorial process has been paused because the total plagiarism of your paper has exceeded the critical ratio 10%. Plagiarism from each source must not exceed 1% due to our rules. If you re-edit and re-submit your article within this rule, your article can be taken to the publishing process. Especially, completely copied sentences should be edited.

The Table 8 seems same with your article <https://online-journals.org/index.php/ijim/article/view/13453/7399> . Please be careful about self plagiarism.

PS. You can see the plagiarism report of your paper at this link:

GENERAL REMARKS AND RECOMMENDATIONS TO THE AUTHOR					
<p>The manuscript is related to examine the usage of the canvas app in processing visual media among prospective teachers. It has some methodological and structural deficits. The following recommendations are presented:</p> <ol style="list-style-type: none">1- Please revise the introduction and literature review. Please check each citation is fitting to the main topic.2-Because you measured only post-test, the research model should be quasi-experimental research.3-Explain your treatment and conventional model.4-Please write detailed information on the validity and reliability of each data collection tool.5-Did you develop this questionnaire? If yes give detailed information. If not, give citations. did you measure "ability to create new products" with this questionnaire?6-What did we measure users' experiences about? Canva or Instagram or what?7-In the results section, only introduce the findings related to the research question.8-Move the first part of the finding section to the data analyses section.9-Please calculate the effect size if p is smaller than the critical value.10-In the study, serious emphasis is placed on the creating of new products, but there is no data or analysis regarding the products produced by the participants and their evaluation. Please revise the manuscript in terms of this perspective.11- Please revise the discussion after other revisions.12-It is not clear what the role of Instagram usage is in the study. Did the students just post?13-Clarify recommendations for practitioners and future researchers.
