salehudin mohammad mohammad salehudin:

We have reached a decision regarding your submission to International Journal of Interactive Mobile Technologies (iJIM), "Instagram User Experience in Learning Graphic Design".

Our decision is to: **REVISIONS REQUIRED**

After collecting reviewers comments I feel that the manuscript is of potential interest to the readership of this journal, but there are major issues that must be addressed before the article could be published:

/\* I believe that you make a number of statements that are not backed up by research. They appear to be your opinion. Unfortunately, the readership of this journal is not interested in what you think. Instead it is interested in what you have proven by research!

/\* The literature review should be more carefully synthesised and structured. The use of sub-headings and signposting would help the reader to follow the argument being developed through the paper.

/\* What was the methodology used for the selection of relevant literature to review for purposes associated with this manuscript? In other words, what were the criteria that drove the search for key publications to support the literature review?

/\* The results section requires far greater organisation and structuring. The analysis is too general, and the reported results are somewhat selective. This section needs to be more carefully and systematically constructed.

/\* Further, the analysis and findings must be critical and interpretive rather than just descriptive.

/\* The final discussion and conclusion should make it clear how the findings contribute to new knowledge.

/\* The Methodology lacked suitable detail.

/\* Methodology of the central work is exposed appropriately.

/\* Research methodology based on research goals is poor on absent.

/\* The research/evaluation methodology is not justified, clear and appropriate (including ethical considerations / approval where appropriate)

/\* More recent bibliography is necessary. Furthermore, the reference list is a little bit weak. Before I can make a final decision on the paper, please refer to more references and upload a new version. It is suggested that the author(s) can consider the following papers related to eLearning, mobile learning, beliefs and attitudes, etc. to strengthen the background and conclusions of the study:

Papadakis, S., Kalogiannakis, M., Sifaki, E., & Vidakis, N. (2018). Access Moodle Using Smart Mobile Phones. A Case Study in a Greek University. In A. Brooks, E. Brooks, N. Vidakis (Eds), Interactivity, Game Creation, Design, Learning, and

Innovation. ArtsIT 2017, DLI 2017. Lecture Notes of the Institute for Computer Sciences, Social Informatics and Telecommunications Engineering, vol 229, (pp. 376-385), Switzerland, Cham: Springer.

Papadakis, S., Zaranis, N., & Kalogiannakis, M. (2019). Parental involvement and attitudes towards young Greek children's mobile usage. *International Journal of Child-Computer Interaction*, 22, 100144.

Kalogiannakis, M. & Papadakis, S. (2019). Evaluating pre-service kindergarten teachers' intention to adopt and use tablets into teaching practice for natural sciences. *Int. J. Mobile Learning and Organisation*, 13, 1, 113–127.

Papadakis, S. (2018). Evaluating pre-service teachers' acceptance of mobile devices with regards to their age and gender: a case study in Greece. *International Journal of Mobile Learning and Organisation*, 12(4), 336-352.

Vidakis, N., Barianos, A.-K., Trampas, A.-M., Papadakis, S., Kalogiannakis, M., & Vassilakis, K. (2019). Generating Education in-Game Data: The Case of an Ancient Theatre Serious Game. In B. McLaren, R. Reilly, S. Zvacek, & J. Uhomoihi (Eds), *Proceedings of the 11th International Conference on Computer Supported Education (CSEDU 2019)*, Vol 1, 36-43, Heraklion, Crete, Greece, 2-4 May, 2019.

/\* The academic writing needs work.

/\* The discussion should be more concise and the outcomes should be discussed in relation to the existing research. The language style of this section has to improve.

/\* Recommendations should also be given for practice and further research.

/\* The paper must be correctly formatted according the journal format

/\* Similarity check with iThenticate revealed a similarity index of 22% which is considered NOT appropriate. A maximum of around 60 quoted words is accepted per paper. There are papers with over 60 words. No previously copyrighted material can be used. See the attachment file with the plagiarism check results.

/\* In preparing a revised manuscript, please also include a table of how you have responded to each of the issues listed above point by point.

I look forward to receiving your revised manuscript in the near future.
